

Retractable terminal *BRN 400*

The Retractable Pit is the optimal solution for storing and protecting the 400 Hz aircraft cable for aircraft parked outside on remote positions.

It provides easy handling of the pit and of the cable.

When closed, it lies flush with the ground.

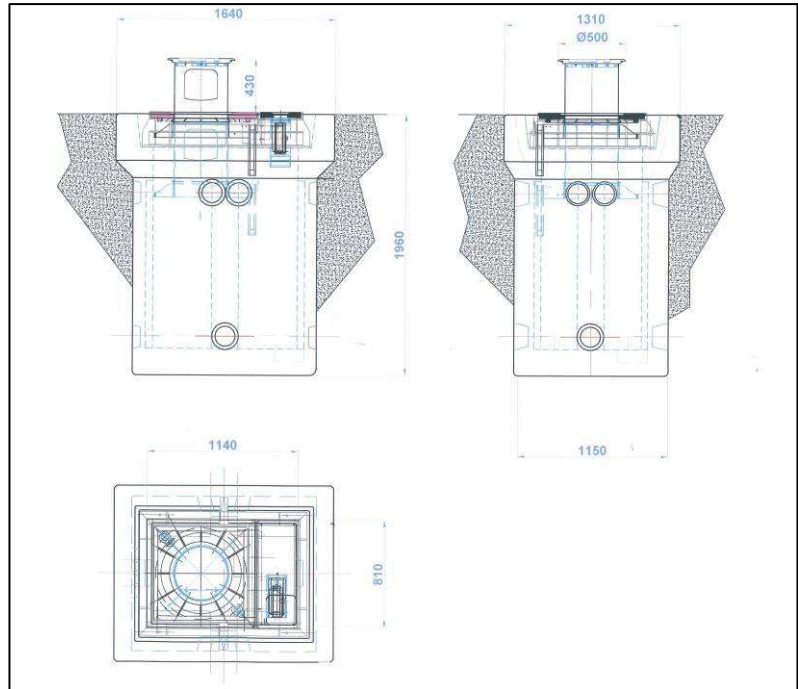

Further facilities, such as aircraft grounding cable, can be incorporated in the Pit

Equipment to be fitted in the pit:

- 400 Hz Aircraft cable with aircraft connector
- 28V DC Aircraft cable with aircraft connector
- Aircraft earthing winder
- Data transfer cables and connectors
- Compressed air
- Electrical box with one or more 50/60 Hz connectors:
 - One or three phases
 - Up to 250 A, three phases per connector
- Etc...

Retractable terminal **BRN 400**

Technical data:

- Dimensions of the hole:
L 1040 mm x W 730 mm x D 1600 mm
- Surface on the ground: 1140 mm x 810 mm
- Height of the raised terminal: 430 mm
- Total weight (depending on version): approx. 600 kg
- Construction:
 - Anodisation coated aluminum
 - Metallic coated steel, epoxy painted
- Automatic raising
- Locking in raised and retracted position
- Automatic lighting in raised position
